

## IN THE SPECIFICATION

- 1) On Page 6, starting at line 20, please add the following new drawing descriptions.

FIG. 9 shows Table 1 which depicts different icons used to indicate the sources of different addresses.

FIG. 10 shows Table 2 which defines possible contextual menus for outgoing address objects.

FIG. 11 shows Table 3 which defines possible contextual menus for incoming address objects.

- 2) On Page 13, please delete Table 1.
- 3) On Page 13, amend the paragraph starting on line 1 as follows:

Instance. An entry denoting a mailing list could also be treated as an object and a unique icon could be employed to indicate the nature of this entry. As shown in Table 1 in FIG. 9, different icons are used to indicate the sources of different addresses. Furthermore, depending on the source and status of the email address parsed from the message header, different actions are taken by the system. The process by which this generally occurs for an incoming message is shown in FIGs. 4A and 4B.

- 4) On Page 19, please delete Table 2.
- 5) On Page 19, amend the paragraph starting on line 1 as follows:

Once an object has been selected, it is preferred that the user have

access to a display of the appropriate contextual, or context-sensitive menu. Such a context-sensitive menu highlights options that are available depending on the context in which the option is called. Depending on the type of address object, various contextual menus are possible. For outgoing address objects, the Table 2 in FIG. 10 defines possible contextual menus.

- 6) On Page 19, amend the sentence starting on line 14 as follows:

For incoming address objects, the contextual menus shown in Table 3 in FIG. 11 are possible:

- 7) On Page 20, please delete Table 3.
